## Keys

### On / Off key

It is used to turn on or off the machine.

Press On / Off Key to switch ON.

Machine will turn on with economy programme in On mode and the number of the economy programme will appear on the programme indicator. In Off position, indicators on the display will turn off.

### Start / Pause / Cancel key

It is used to start, pause or cancel a selected programme or function.

### Programme Selection keys

They are used to select the washing programme you determined from the table of "Programme data and average consumption values".

### Delayed Start key

It should be pressed to make the time delay settings.

## Programme selection

1. Press the On/Off button to turn on your machine.
2. Refer to the table of "Programme data and average consumption values" to determine a washing programme suitable for your dishes.
3. Press Programme Selection keys until the number of the programme you selected appears on the Programme indicator. Use P+ to switch to the next programme, and P- to switch to the previous one.

## Preparing the machine

1. Open the door of the dishwasher.
2. Place the dishes in accordance with the instructions in the user manual.
3. Make sure that the upper and lower impellers rotate freely.
4. Put adequate amount of detergent into the detergent dispenser.
5. Check if the Salt and Rinse Aid indicators light and add salt and/or rinse aid if needed.
6. Close the door of the dishwasher.

Programme Data and Average Consumption Values Table								
Programme number	1	2	3	4	5	6	7	8
Programme name	Eco *	Smart	MixWash+	Intensive	Quick&Clean (#)	GlassCare	Quick (#)	Prewash
Cleaning temperature	50 °C	40-65 °C	-	70 °C	60 °C	40 °C	35 °C	-
Degree of Soiling	Suitable for washing dishes with normal amount of soil. It is the most efficient program in terms of combined power and water consumption. This is used for assessing the compliance with EU's eco-design directive.	Determines the soiling degree of the dishes and sets the temperature and amount of the washing water as well as the washing time automatically. Suitable for all types of dishes.	It is the most suitable washing programme for daily mixed dishes including plastic items. While delicate glass items are washed in the upper basket, pans and trays can be washed in the lower basket.	Suitable for heavily soiled dishes, pots and pans.	Daily washing programme for normally soiled dishes in the fastest way.	Special programme for gentle cleaning of delicate glassware.	Suitable for lightly soiled daily dishes that are scraped or pre-cleaned.	Suitable for removing the remnants on the soiled dishes that will be kept waiting in the machine for a few days, and thus, for preventing the bad odour buildup.
	Medium	Medium to high	Medium	High	Medium	Low	Low	-
Prewash	+	+	+	+	-	+	-	+
Wash	+	+	+	+	+	+	+	-
Dry	+	+	+	+	+	+	-	-
Duration (min)	236	110-198	219	187	58	129	30	15
Water (l)	9,5	9,4-12,4	19,0	16,8	10,6	13,6	10,8	4
Energy (kWh)	0,768	0,90-1,45	1,53	1,51	1,18	1,02	0,8	0
Selectable functions	T, E, Y, F, S, R, U, Z, H, M, K	T, E, R, Z, H, M, K	T, E, Y, F, Z, H, M, K	T, E, Y, F, R, U, Z, H, M, K	T, E, G, R, B, H, M	T, E, G, Y, F, R, B, M, K	T, E, B, M	-

#### Loading Capacity: 16

The consumption values shown in the table were determined under standard conditions. Differences may therefore occur under practical conditions. \* Reference programme for testing institutes. The tests in accordance with EN 50242/60436 must be carried out with a full water softener salt dispenser and a full rinse aid reservoir, and using the test programme. The values given for programmes other than Eco 50°C programme are indicative only. (#) Additional functions might cause changes in programme durations.

## Additional functions

Washing programs of the machine are designed to achieve the best cleaning performance by considering the soil level, the amount of dirt and the characteristics of the dishes to be washed in the machine.

Additional functions have been added to help you save time, water and energy and to perform a more hygienic and comfortable washing, thanks to the customized features settings.

- i** Additional functions may change the duration of the selected program.
- i** Additional functions are not suitable for all washing programs. The indicator of the function that is not suitable for the program will not be active.
- i** Functions that can be used in washing programs are shown with letters such as "**A,B,D,E,G,F,K...**" in the "Program information and average consumption values table". You can find instructions on the use of these functions in the "Additional functions" section of the user manual.
- i** Some auxiliary functions cannot be used together. If the function you selected is not active even though it appears in the "Program information and average consumption values table", you can activate it after turning off the other auxiliary functions.

### To add additional functions to the program:

1. Select the desired washing program.
2. When you select an additional function, the indicator of the additional function lights up. When you press the function button again, the indicator turns off and the selection is cancelled.

- i** If your machine has sub-menu functions depending on the model, see the instructions in the additional functions section for their use.

## Tablet Detergent Function (T)

(depends on the model)

Depending on the mains water hardness, it provides better drying performance in washings made with multi-purpose detergents which are named 2in1, 3in1, 4in1, 5in1, all-in-one etc.

When you select the tablet detergent function, the Tablet Detergent indicator lights up.

- i** Depending on the control system of your machine, if the Tablet Detergent function is not available in the program you selected, its indicator turns off. You can find the information in which programs the tablet detergent function can be used in the "Program information and average consumption values table".
- i** In some models, depending on the control system of your machine, even though the Tablet Detergent function is not available in the program you have selected, its indicator may remain lit as long as the Tablet detergent function is not turned off. You can find the information in which programs this function can be used in the "Program information and average consumption values table".
- i** If you used the Tablet Detergent feature in the last washing program you used, the Tablet Detergent function will remain active in the next washing program you selected.
- i** The tablet detergent function can increase the program time up to 35 minutes.

## **Automatic Tablet Detergent Detection (T)**

(depends on the model)

The Automatic Tablet Detergent Detection feature includes a system that detects the type of detergent you use and automatically adapts the washing program and drying system to the best performance.

**i** In case of using tablet detergent, the program duration and temperature may be changed in order to improve the washing and drying performance.

Thanks to this feature, there is no need to press any function key while using tablet detergent.

**i** It can extend the duration of the program in which it will be active up to 30 minutes.

If automatic detergent detection is desired, the feature should be activated.

### **To activate / to deactivate:**

1. After turning on the machine, press Time Delay and P+ keys simultaneously. Keep them pressed until the countdown 3, 2, 1 is completed on the display.
2. Press P+ key to activate the a: option. Automatic detergent detection feature is disabled at "a:0" option and enabled at "a:1" option. Set the desired option by pressing the Time Delay key.
3. Turn off the machine with On/Off key to save the changes.

## **Fast+ function (F)**

(depends on the model)

By enabling the selected program to wash at higher pressure and temperature, it shortens the washing time and reduces the amount of water.

## **Half Load function (Y)**

(depends on the model)

It is used when you want to run your machine without fully fill it.

1. Place your dishes in your machine as you wish.
2. Turn on the machine from the On / Off button.
3. After selecting the desired program, press the Half Load button.

When the function is active, the Half Load indicator lights up in the function selected indicator and on the screen.

**i** Thanks to the Half Load function, you save water and energy while using the lower and upper baskets of your machine at the same time.

## **TrayWash Function (U)**

(depends on the model)

For this function to work, select the Intensive 70°C program and press the function key.

## **TurboWash Function (U)**

(depends on the model)

In the selected program, the lower impeller is operated at higher pressure to provide an advantage in washing dishes with hard-to-clean dried dirt such as pots and pans placed in the lower basket.

## **Super Rinse function (R)**

(depends on the model)

In case you experience detergent dissolution problems depending on the type of detergent you use, it provides the best rinsing performance by removing the stains that will remain on your dishes.

**i** It can increase the selected program duration by 25-35 minutes.

### Extra Drying function (E)

(depends on the model)

This function enables high level of drying performance. It can extend the duration of the selected program up to 30 minutes.

### AquaIntense function (Z)

(depends on the model)

The AquaIntense impeller located under the lower impeller ensures that your heavily soiled dishes placed on the

right side of the lower basket are washed in appropriate programs. It would be appropriate to place the dirtiest dishes on the right front.

**i** Program duration can be extended up to 20% when the function is selected.

**i** AquaIntense Do not attempt to remove the impeller part!

### SelfDry Function (K)

(Depends on the Model)

"SelfDry" feature of your machine increases drying efficiency of your machine and saves energy.

When you activate this function, the door of your machine opens automatically at the end of the washing program.

**i** Function can extend the duration of the selected program up to 35 minutes.

**i** Auto Door Open feature opens the door of the machine at the end of the washing cycle, thanks to the "door opening shafts". This process takes approximately 2 minutes. If the power fails while the shafts are moving out, do not force to close the door. When the power is back, the process shall be completed, and the shafts shall return to their initial position.

### EverClean Function (M)

(depends on the model)

When you activate this function, your micro filter is cleaned with a special system at the end of the wash and is ready for the next machine use. Depending on the using conditions, this process extends the cleaning period of the micro filter and increases the washing performance of the machine. In order to use this function effectively, it is recommended to use it in every wash.

## Quick Guide

### Adjusting the water softening system

Washing, rinsing and drying performance of your dishwasher will improve when the water softening system is adjusted correctly.

To adjust the system, first learn the water hardness in your region and adjust as indicated below.

- Unpack the test strip.
- Open the tap and let the water flow for approx. 1 minute.
- Dip in the test strip into the water for 1 second.
- Take out the strip from the water and shake it.
- Wait for 1 minute.
- Make the necessary adjustment according to the test strip.

#### After detecting the water hardness:

1. After turning on the machine, press Delayed Start and P+/P keys simultaneously. After the countdown (3, 2, 1) is displayed keep the keys pressed for a while.
2. Press P+/P key to activate the  $\curvearrowright$  position.
3. Using Delayed Start key, adjust water hardness level according to the hardness of the supply water. See "Water hardness level adjustment table" for correct setting.
4. Press On / Off key to save the setting.

#### Water hardness level adjustment table

Hardness Level	English Water Hardness °dE	German Water Hardness °dH	French* Water Hardness °dF	Water Hardness Level Indicator
Level 0 	0-5	0-4	0-8	Press the Delayed Start key to switch the water hardness level to position 1. (r1)
Level 1 	6-9	5-7	9-13	
Level 2 	10-15	8-12	14-22	Press the Delayed Start key to switch the water hardness level to position 2. (r2)
Level 3 	16-19	13-15	23-27	Press the Delayed Start key to switch the water hardness level to position 3. (r3)
Level 4 	20-24	16-19	28-34	Press the Delayed Start key to switch the water hardness level to position 4. (r4)
Level 5 	25-62	20-50	35-90	Press the Delayed Start key to switch the water hardness level to position 5. (r5)

- If the hardness level of the water that you use is above 50°dH or if you are using well water, than it is recommended to use filter and water purification devices.
  - If the hardness level of the water that you use is below 7°dH, there is no need to use salt in your dishwasher. In this case, the Salt Indicator light on the control panel of your dishwasher will light continuously.
  - If the water hardness is set to level 1, the Salt Indicator will light continuously although it is not necessary to use salt. If you use salt under this condition, salt will not be consumed and the lamp will not illuminate.
- i** When moving, you will need to set the water hardness level of your dishwasher again according to the information above, depending on the water hardness of the place you have moved to. If the water hardness level of your machine is adjusted previously, your machine will display the most recent hardness level adjustment.
