16	My Cycle													To save frequently used programme settings.

<sup>\*</sup> Standard programmes for washing cotton fabrics at 60 °C and 40 °C. These programmes are suitable for washing normally soiled cotton fabrics. These are the most effective programmes for washing these type of fabrics, taking into account the total energy and water consumption.

Real water temperature may differ from the declared wash cycle temperature.

Above mentioned time is an estimate and may differ from actual wash cycle time, depending on temperature, water pressure, load size, etc. The time is automatically updated during wash cycle. Displaying the same time for an extended period or abrupt changes are normal.

<sup>\*\*</sup> The most energy and water efficient wash programmes are generally those that run at lower temperature and for a long time.

<sup>\*\*\*</sup> Loading the washing machine to the full capacity indicated by the manufacturer for the respective wash programmes will save energy and water.

NOTE:

Use detergent or fabric softener if necessary,

Detergent required, without which washing will be ineffective.
