Dear Customer,

This Quick Start Guide is enclosed with detailed washing machine operating instructions. Before using the appliance carefully read the Operating Instructions, especially guidelines for safe use.

Before plugging your appliance into the mains power, remove the transport bolts and level the appliance. Do not start the washing machine before it is properly set up.

Only wash delicate fabrics, synthetics, wool using designated programs. Only load such fabrics according a table of the maximum load sizes (see page 2).

The correct appliance operation extends its lifetime so make sure the drum seal is dry (leave the door ajar after washing). Clean the appliance with mild cleaning agents, do NOT scrub with abrasive agents.

1 Before you start washing

- Empty pockets.
- Close all zips and button up duvet covers.
- Wash delicate and small items in a protective mesh laundry bag.
- Open the appliance door by pressing the handle on the inside.
- Insert the sorted clothes into the washing machine:
  - Cotton — max full drum.
  - Synthetics — max ½ of the drum.
  - Silk, wool — max ⅓ of the drum.
- Close the door, press firmly against the seal.

2 Add detergent

- Open the detergent drawer by pulling the handle.
- Pour the recommended dose of washing detergent into the appropriate compartment of the detergent drawer.
- Add fabric conditioner to the appropriate compartment if required.
  - II MAIN WASH detergent.
  - ❀ Fabric softener or other special care liquids
  - I PREWASH detergent.

3 Select a washing programme

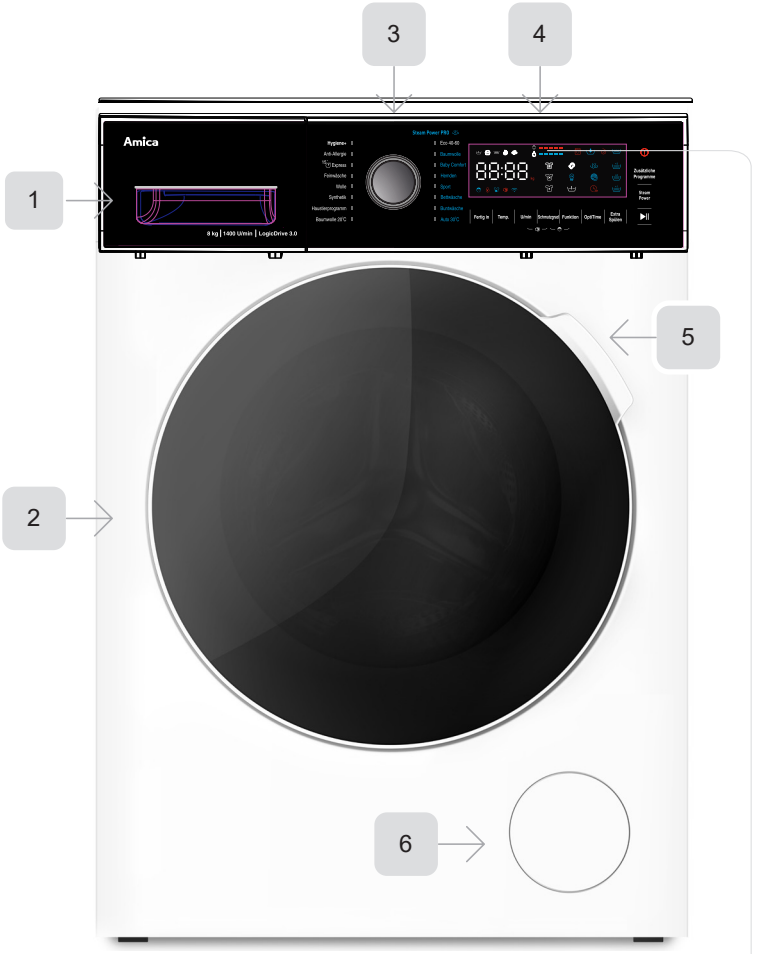

- Set the programme selector knob to the desired programme.
- Customize the programme to your needs — you can change the temperature, spin speed, or enable additional features.
- Select additional functions - described in the “Table of programmes” (see page 2.).

4 Select START

- Close the appliance door.
- Turn the programme selector to the desired programme (see page 2.).
- Select additional functions or wash cycle parameters as required – according to your needs.
- Select Time Remaining ranging from 0 to 24 hours.
- Then press the START/ PAUSE button

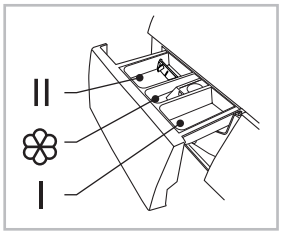

5 End of the wash

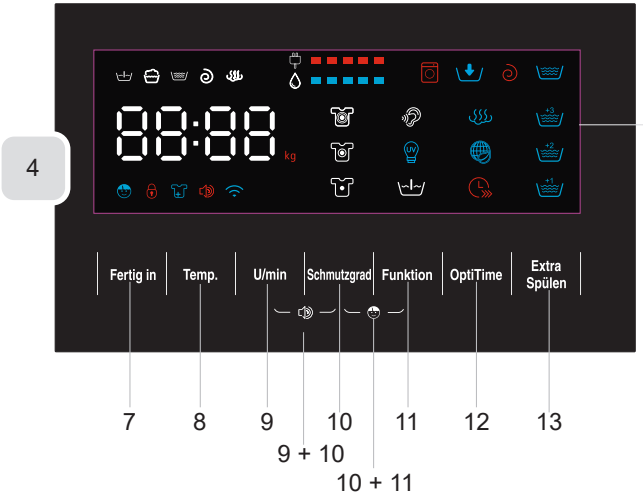

- End of the wash cycle is indicated by acoustic signal (if active). The display shows END and the door lock indicator light goes out.
- Close the water valve.
- Turn washing machine off.
- Unplug the appliance from the wall outlet.
- Open the door and remove laundry. Once clothes are removed, leave the door slightly ajar to allow the drum seal to dry before the door is closed properly. Leave the detergent drawer compartment slightly ajar to allow it to dry.

* Use this programme to preserve colours of coloured clothes Default 40°C cannot be selected, can be washed at around 40°C–60°C.

** The most efficient programmes in terms of energy and water consumption are generally those that are run at lower temperatures and for longer time.

*** You will save energy and water by loading your household appliance to the full capacity indicated by the manufacturer for the appropriate programmes.

NOTE: Actual water temperature may differ from the declared wash cycle temperature.

NOTE: Above mentioned time is an estimate and may differ from actual wash cycle time, depending on temperature, water pressure, load size, etc. The time is automatically updated during wash cycle. Displaying the same time for an extended period or abrupt time indication changes are normal.

○ Use detergent or fabric softener if necessary.

● Detergent required, without which washing will be ineffective.

× Do not use detergent or fabric softener.

• The above data is for reference only, and the data may change due to different actual use conditions.
• The values given for programmes other than the Eco 40-60 programme are indicative only.
• Cotton 20°C program is able to clean lightly soiled cotton laundry, at a nominal temperature of 20°C, which complies with the regulation (EU) 2019/2023.
• Concerning to EN 60456:2016/A11:2020 With (EU)2019/2014, (EU)2019/2023, (EU)2021/340, (EU)2021/341
The EU energy efficiency class is: A
Energy test program: Eco 40-60. Other as the default.
Half load for 8.0kg machine: 4.0kg.
Quarter load for 8.0kg machine: 2.0kg.

[1)] The highest temperature reached by the laundry in the wash cycle for at least 5 minutes.
[2)] Residual moisture after the wash cycle in water content percent and the spin speed at which this was achieved.
[3)] The ECO 40-60 programme is able to clean normally soiled cotton laundry declared to be washable at 40°C or 60°C, together in the same cycle. This programme is used to assess the compliance with the regulation (EU) 2019/2023.

The most efficient programmes in terms of energy consumption are generally those that perform at lower temperatures and longer duration.
Loading the household washing machine up to the capacity indicated for the respective programmes will contribute to energy and water savings.
Noise and remaining moisture content are influenced by the spinning speed: the higher the spinning speed in the spinning phase, the higher the noise and the lower the remaining moisture content.
